Embedded liberalism is a term for the global economic system and the associated international political orientation as they existed from the end of World War II to the 1970s. The system was set up to support a combination of free trade with the freedom for states to enhance their provision of welfare and to regulate their economies to reduce unemployment.

### **Embedded liberalism - Wikipedia**

Liberalism is a political and moral philosophy based on liberty and equality. Liberals espouse a wide array of views depending on their understanding of these principles, but they generally support civil rights, democracy, secularism, gender equality, racial equality, internationalism, freedom of speech, freedom of the press, freedom of religion, and free markets.
