

discrete time control systems pdf

Industrial control system (ICS) is a general term that encompasses several types of control systems and associated instrumentation used for industrial process control.. Such systems can range from a few modular panel-mounted controllers to large interconnected and interactive distributed control systems with many thousands of field connections.

Industrial control system - Wikipedia

A distributed control system (DCS) is a computerised control system for a process or plant usually with a large number of control loops, in which autonomous controllers are distributed throughout the system, but there is central operator supervisory control.This is in contrast to systems that use centralized controllers; either discrete controllers located at a central control room or within a ...
