Introduction. We are pleased to announce High-Performance Graphics 2018. High-Performance Graphics is the leading international forum for performance-oriented graphics and imaging systems research including innovative algorithms, efficient implementations, languages, compilers, parallelism, and hardware architectures for high-performance graphics.

Processor design is the design engineering task of creating a processor, a component of computer hardware. It is a subfield of computer engineering (design, development and implementation) and electronics engineering (fabrication). The design process involves choosing an instruction set and a certain execution paradigm (e.g. VLIW or RISC) and results in a microarchitecture, which might be ...

An embedded system is a controller programmed and controlled by a real-time operating system (RTOS) with a dedicated function within a larger mechanical or electrical system, often with real-time computing constraints. It is embedded as part of a complete device often including hardware and mechanical parts. Embedded systems control many devices in common use today.

Plug-In for Search Engines Based on Microsoft's IFilter Index Interface. Foxit PDF IFilter is a robust implementation of Microsoft's IFilter indexing interface. It works with all search and retrieval products supporting the IFilter interface (for example, SharePoint and SQL Server). Such products use format-specific filter programs (called IFilters) for particular file formats (for ...

OVERVIEW The DesignWare® DW8051 MacroCell is a high-performance, configurable, fully-synthesizable, and reusable 8051 core. It is fully binary compatible with the industry standard 803x/805x microcontrollers. An encrypted version of the DW8051 MacroCell is available to all DesignWare Foundation Library users
